AIMS OF THE DOCUMENT

The aims of this document are to:

- define the structure of the programme;
- specify the programme award titles;
- identify programme and level learning outcomes;
- articulate the regulations governing the awards defined within the document.

AIMS OF THE PROGRAMME

This programme is designed to produce visionary Marketing Communications professionals with key knowledges and skills relevant to the academic and professional discipline. Our graduates will be able to define new industry practice and benchmarks for excellence in their field; they will be facilitated and supported in becoming independent, innovative, strategic, creative, entrepreneurial, and ethical practitioners. Our most successful graduates will be capable of contributing to the transformation of their industries.

The aim of the Marketing Communications programme is to transform students into reflective, critical practitioners in a wide range of future career opportunities and potential future study. Graduates of this programme develop knowledge and understanding of the historical roots of marketing communications, as well as the context in which it takes place; be critical of existing practice and be innovative, strategic, and creative in their own practice.

This programme aims to develop critically informed, agile and resourceful graduates, who:

- have a solid understanding of marketing communications concepts and practices, including analysis, planning, implementation and control.
- can develop innovative and effective solutions to communication problems, addressing the needs of a diverse group of internal and external stakeholders.
- appreciate the value of traditional and digital media in marketing communications and the range of applications for media, the tools, strategies and techniques to engage and understand contemporary consumers and organisations;
- can critically appraise contemporary marketing communication theories and practice relevant to academic and industry needs;
- have a deep understanding of the cultural and societal impact of marketing communications
- have highly-developed interpersonal skills and communication skills;
- are able to manage their own personal development and lifelong learning.

Graduates of this programme will be equipped to enter a range of potential careers where it is vital to have knowledge and expertise in marketing communications as a core strategic activity, as well as its practices. Marketing communications professionals work in a range of organisations and institutions in every sector and industry, with a variety of job roles and responsibilities that require knowledge and understanding of marketing communications theory and practice. As such, our programme prepares graduates to be agile and versatile to work in a range of contexts within organisations in a variety of job roles now and into the future.

The programme aims and learning outcomes have been designed with reference to:

- The QAA Benchmarking Statement for Communication, Media, Film and Cultural Studies (October 2016),
- The Frameworks for Higher Education Qualifications and UK Degree-Awarding Bodies (October 2014),
- Brown, T. 2014. *Back to basics: meeting the needs of today's marketers and building capability for tomorrow*. Cookham: Chartered Institute of Marketing
- Hays Marketing, 2016. *Elements of a Marketer: Skills for a Digital World*. London: Hays Recruitment
- The research, academic, and professional expertise of the programme team.

ALIGNMENT WITH THE UNIVERSITY'S STRATEGIC PLAN

The Marketing Communications programme is aligned to the principles of BU2025, especially “inspiring learning, advancing knowledge and enriching society through the fusion of education, research and practice.” This degree evolves from the expertise built within the department and especially the research and professional practice of staff who specialise in marketing communications. The Marketing Communications programme has a long and distinguished history for offering an excellent, industry-relevant programme and is sector-leading as evidenced by HESA 2017 data (UG CMC Market Research Report 2017). The programme has exceptional industry links supported in part through its prominent alumni, who work in the media, entertainment, fashion, automotive, technology, and charity sectors as well as a range of leading communication agencies. Additionally, BU is the home to the annual Chartered Institute of Marketing “flagship” Mike Warne Event, attracting practitioners, business professional, academic staff and students to their only external student-led event on the calendar. The degree has benefited from alumni mentoring, giving live briefs to the students and participating in master class sessions. The department’s research and professional practice have played an important role in the continuous improvement of the degree, and students directly benefit from working with staff with national and international research and professional reputations.

The programme team has wide-ranging and interdisciplinary expertise grounded in years of research and professional practice within the fields of marketing communications, public relations, advertising, politics and political communications, consumer behaviour, branding, organisational behaviour, sociology, and cultural studies. The programme is designed to balance academic rigour with the expectations of a demanding and fast-paced industry to develop the reflective, critical, strategic, creative practitioners described above. We do this by providing a range of opportunities for students, including:

- **Live Briefs for Unit Assessments:** companies have worked with staff to give students the opportunity to work on live current briefs, which allow them to explore and apply their marketing communications knowledge. Previous partners have included, Dorset Police, Weymouth Sea Life Centre, Organix, Merlin Entertainment and other local and national organisations.
- **Student involvement in External Marketing Competitions:** Students have as an extra-curricular option, chosen to put themselves forward for student competitions such as The Pitch. In 2017 a team of our Marketing Communications students came second in this nationwide student competition. Some have been put forward through academic staff; others through the successful SUBU Marketing Society.
- **Student-led, Co-creation of research:** SURE Conference allows students to present their academic work to an external audience, as part of the BU engagement strategy with the wider community.
- **Student research assistants:** Bournemouth University regularly offers the opportunity for undergraduate students to take up paid work as research assistants on staff projects relevant to their degree. The department has had considerable success in recruiting students from our undergraduate programmes to work alongside them in academic and professional research projects.
- **The Journal of Promotional Communications and dissertation conference:** Annually, the department holds a dissertation conference where students have the opportunity to present their final research to their peers, staff, industry and academic guests, and their parents/guardians. They also have the opportunity to have their dissertation published in the department’s open access *Journal of Promotional Communications*.
- **Masterclass series:** As noted above, the department annually holds a masterclass series where students have the opportunity to hear from professionals working in advertising, marketing communications, public relations and digital media, including Edelman, Google, and Future Brands.
- **CIM Mike Warne Event:** Group of final year students create, plan and execute the only external event on the CIM national calendar, based on the latest topics dominating our discipline. Past events have focused on Influencer marketing (2018), virtual reality (2017), and Sponsorship (2016), attracting guest speakers from companies such as Warner Bros, SORTEDFood, Barclays, Virgin Media and various leading communications agencies.

Programme Specification - Section 2

Although the department's programmes have always provided a dynamic curriculum that leads to highly employable graduates, the new suite of Marketing Communications degrees enhances this through further aligning and integrating industry-standard qualifications relevant to each of the titles. We have historically offered some of these qualifications (e.g. the CIM Foundation Certificate) as a co-curricular/extra-curricular opportunity, but the newly designed degrees more closely align the certifications with the programmes. In doing so, it ensures the sustainability of providing students with the opportunity to gain these certifications (e.g. ensuring sufficient staff resources in teaching, assessment and administration for the certifications) and supporting all students in achieving certifications in addition to their degree that enhances their employability. Certifications for students undertaking Marketing Communications include:

- CIM Foundation Certificate in Marketing
- CIM Certificate in Professional Marketing
- CIM Diploma in Professional Marketing

In most cases, students will undertake these certifications in levels 4 and 5, which is before undertaking a mandatory placement. The placement is an important feature of BU degrees as it helps students contextualise their learning in relevant employment, realising and embedding the theoretical, practical and transferrable knowledge and skills learned on the degree. CMC students have undertaken placements at a range of companies/organisations across every conceivable sector (e.g. Sky, Disney, Panasonic, HP, IBM, Rolls Royce, Bentley)

Many of our graduates have returned to full time employment with their placement companies. Within 2-3 years, our graduates have secured positions such as:

- Associate Brand Specialist at Amazon
- Brand Manager at Johnson & Johnson
- Senior Account Executive at Spark44
- Digital marketing executive at Disney
- Marketing executive at Ford UK.
- Worldwide Product Marketing Manager at HP Enterprise.
- Business Development Managers at Infotrack
- Channel Manager at Vodafone

The evaluation of this work-based learning experience has recently been redesigned to invite students to write a reflective blog linking their placement to their educational experiences and develop a poster that outlines their placement achievements. The poster is then displayed at a placement celebration, held for the first time in 2017, where all the department's students returning from placement display their posters to peers, staff, industry guests, and level 5 students who will go on placement at the end of the academic year. The celebration included inspirational industry and student speakers, awards, and a networking opportunity.

The BA (Hons) Marketing Communications programme is designed to allow students to develop in-depth learning across the broad marketing communications areas, throughout their degree. Their first year will build a strong foundation, upon which in their second year, they will undertake units particular to this chosen programme (e.g. Customer Experience; Marketing Communications in a Global Context). Students have a further opportunity to personalise their learning through the choice of two options in their final year and their dissertation project. The dissertation, which is primarily carried out in semester 2 of the final year, culminates the student's degree programme. This research project allows students to develop a piece of research of individual interest and can take the form of an academic study (humanities or social sciences) or a practice-based research project. Additionally, students can share their research through the department's annual dissertation conference, which attracts industry (including alumni) and academic guests and allows for students to invite their parents to see their work. Some of the strongest dissertations are also published in the department's open-access, online journal – *The Journal of Promotional Communications*. The combination of the above is just one of many examples of how these programmes meet the university aim of "inspiring learning, advancing knowledge and enriching society through the fusion of education, research and practice."

The new programme content and structure builds on the success of the past and the solid foundation that the department's marketing communications, advertising, and public relations programmes provided. This programme will further contribute to this emphasis on providing an industry-relevant and

Programme Specification - Section 2

authentic curriculum, opportunities for all students to achieve their personal and professional goals, and an outstanding student experience, which aligns with BU2025 values of excellence, inclusivity, creativity and responsibility.

LEARNING HOURS AND ASSESSMENT

Bournemouth University taught programmes are composed of units of study, which are assigned a credit value indicating the amount of learning undertaken. The minimum credit value of a unit is normally 20 credits, above which credit values normally increase at 20-point intervals. 20 credits is the equivalent of 200 study hours required of the student, including lectures, seminars, assessment and independent study. 20 University credits are equivalent to 10 European Credit Transfer System (ECTS) credits.

The assessment workload for each unit is designed to align with BU assessment design regulations and is reviewed annually to ensure appropriate balance of assessment across the programme and level.

Specific to this programme, most units are worth 20 credits (the dissertation is worth 40 credits) and are compliant with the common academic structure. Students undertake a sandwich placement for a full-time work-based learning experience typically between Levels 5 and 6.

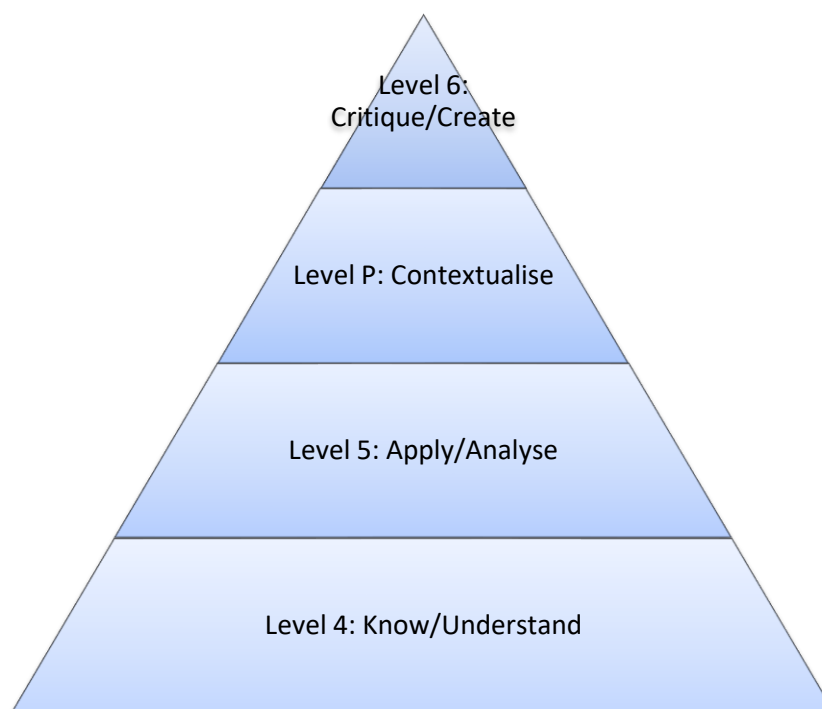

STAFF DELIVERING THE PROGRAMME

Students will usually be taught by a combination of senior academic staff with others who have relevant expertise including – where appropriate according to the content of the unit – academic staff, qualified professional practitioners, demonstrators/technicians and research students.

INTENDED LEARNING OUTCOMES – AND HOW THE PROGRAMME ENABLES STUDENTS TO ACHIEVE AND DEMONSTRATE THE INTENDED LEARNING OUTCOMES

Learning on the Marketing Communications programme is developmental and designed to scaffold knowledge and skills throughout the curriculum. It is also designed to recognise the diversity of students and their prior educational and life experiences. The four-year programme is designed to create an environment full of learning opportunities that turn a curious student into a critical and creative thinker in marketing communications. The curriculum can be broadly understood to follow this pedagogy:

Programme Specification - Section 2

This developmental approach to learning on the programme means that students are engaging the following kinds of learning:

- **Level 4** – Learning foundational knowledge, theories and skills. Specifically defining key concepts and identifying core knowledge that informs the academic and professional practice for Marketing Communications.
- **Level 5** – Building on the foundation set at level 4, students will apply, expand and deepen this acquired knowledge and skillset in level 5. This level has a particular focus on preparing students for placement and so the curriculum significantly focuses on applied knowledge and practice, as well as analysis/evaluation of marketing communications.
- **Placement** – During placement students will have the opportunities to reflect on and put into practice the theoretical, practical and transferrable knowledge and skills gained at Level 5 through relevant employment.
- **Level 6** – With the accumulated knowledge and practice gained through the programme, students have opportunities to critique and innovate marketing communications knowledge and practice.

The programme team recognises there is inevitable blurriness between knowing (level 4), applying (level 5), contextualising (placement) and critiquing (level 6), but finds articulating the pedagogical approach is particularly useful in clarifying the learning outcomes, assessment and what we expect students to deliver at each level. It is also an accessible model for outlining the pedagogical approach of the programme for students, staff, externals, employers, and other relevant stakeholders.

The first-year experience is key to the department's pedagogical approach, which was strongly established in the previous validation of the department's marketing communications degrees. It established an approach to designing and delivering the Level 4 Semester 1 units that support students' transition from a range of previous educational experiences to undergraduate study, which based on global higher education research and the experiences of our students and staff, is a challenging transition for many. These first units that students encounter – Principles of Marketing and Marketing Communications; Contemporary Debates in Marketing Communications; and Academic and Professional Practices for Marketing Communications – are designed to work in concert to clearly signpost connections in the knowledges and skills acquired in the individual units and to support the academic skill development students need for university. Altogether, it aims to reduce the potential for

BA (Hons) Marketing Communications

Version 1.7-0923

© Bournemouth University 2018

Programme Specification - Section 2

students – and staff – to treat units as silos and facilitate the integration of knowledge that is so important for students' long-term academic and professional success. Staff delivering these units work collaboratively to ensure that content each week is linked across the three units. Furthermore, it aims to provide students with foundational academic skills that are appropriate to university and lifelong learning; including library and desk-based research, critical thinking and evaluation, critical reading and writing, building academic and professional credibility through proper referencing relevant to each context, peer- and self-assessment, and other important lifelong learning skills. The semester 2 units continue to build on that foundation set in semester 1, but begin to encourage students towards greater independence in their learning for work at higher levels.

This first year is foundational to the suite of marketing communications degrees and supports students' understanding of marketing communications (used in this context as an umbrella term for to include the related fields of advertising and public relations). As such, it is shared across the four programmes and is designed to help students understand and locate Marketing Communications, Advertising, Public Relations and Digital Media before choosing their final degree title, which they would enrol on from second year.

Overall, teaching and learning at level 4 will be more formal and structured through lectures, seminars and tasks set in the virtual learning environment to support students in making the transition to university. Structured reading alongside formative and summative assessment tasks will enable them to gain and share the knowledge and understanding of marketing communications, and introduce them to accessing and appreciating the range of subject-specific academic and professional resources available to them. Students will also be introduced to technology enhanced learning through a range of tools, including those within and beyond the virtual learning environment (Brightspace).

In level 5, students have an opportunity to develop intermediate knowledge and skills relevant to all areas of marketing communications. At this level, the degree differentiates from the others in the suite through programme-specific content (e.g. the Customer Experience unit) and in units that are shared across the suite of degrees (e.g. Content Creation) through bespoke seminars, which allow students to consider how shared practices are adopted and adapted across marketing communications. Also important at this level is the continued development of students as independent scholars. Though formal classroom-based learning and guided independent learning on the virtual learning environment and through reading and independent study tasks, students will be asked to engage more in student-led seminars individually and in small groups to continually enhance independent, critical thinking appropriate to this level.

During the placement, students have the opportunity to put into practice the knowledge and professional and transferrable skills learned in the first two years of study. This work-based learning experience is an integral part of the programme, which is why it is a requirement for students to undertake the sandwich placement unless they can demonstrate they have engaged in equivalent, relevant work-based learning experience.

In Level 6, students continue to develop their expertise in marketing communications and have the opportunity to personalise their learning experience through the choice of options and setting their dissertation title. Units at this level are designed to enable students to reflect on their placement experience and the first two years of study to synthesise their learning and evaluate/critique marketing communications.

Through the scaffolding of knowledge and skills throughout the programme as appropriate to each level, graduates are expected to demonstrate thorough understanding of marketing communications, advertising, public relations and digital media concepts, theories, and practices in order to critically evaluate these fields and the communications produced by professionals in these fields. In doing so, they will be prepared to develop innovative and ethical/socially responsible communications as cutting-edge professionals in their field. They will have a range of discipline-specific and transferrable skills, including primary and secondary research and analysis, problem-solving, argumentation, communication, and independent working skills.

Assessment on the programme draws on a range of assessment tools and techniques, including individual and group work written and oral assignments, live briefs, essays and examinations. Fundamental to the university principles of assessment and programme's assessment strategy is the

BA (Hons) Marketing Communications

Version 1.7-0923

© Bournemouth University 2018

Programme Specification - Section 2

use of formative assessment to support student development through appropriate and timely feedback, as such each unit includes an indication of formative assessment. These will be appropriate to each unit, but can include essay plans, multiple-choice quizzes on the virtual learning environment, report completions (e.g. writing the introduction or conclusion on an industry report), developing a table or graph from a dataset, etc. Feedback for these formative tasks can similarly take a variety of forms, including staff and peer feedback

Specific to summative assessment, the balance and diet of assessment will be reviewed annually through the university's annual monitoring process and the development of the following year's independent marking plan to ensure that year-to-year amendments/evolutions to individual unit assessment strategies do not create imbalances in the overall assessment and feedback strategy for the programme.

As appropriate to individual units, examinations (which are typically 2 or 3 hours in duration) may be seen or unseen. Examinations provide students with the opportunity to demonstrate their ability to structure a concise, reasoned argument and analyse an issue in a limited timeframe. Where appropriate, exams will be unseen, case-study based or open book/notes.

Coursework, which is included in all units on the programme, can include a range of assessment methods to ensure an inclusive approach to assessment and to embed authentic and discipline-relevant assessments throughout the programme. The specific methods include essays, reports, presentations, leading a seminar or group discussion, viva, marketing communications strategies, writing for different media, negotiated assignments, live briefs from external agencies/clients, and so on.

PROGRAMME AND LEVEL 6 INTENDED PROGRAMME OUTCOMES

A: Subject knowledge and understanding	The following learning and teaching and assessment strategies and methods enable students to achieve and to demonstrate the programme learning outcomes:
This programme provides opportunities for students to develop and demonstrate knowledge and understanding of:	
A1 Critically engage with bodies of knowledge relevant to marketing communications	Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> • lectures (A1 – A5); • seminars (A1 – A5); • directed reading (A1, A3); • use of the VLE (A4, A5); • independent research (for dissertation and coursework) (A5).
A2 Achieve a critical appreciation of the organisational, political, social, commercial and economic contexts of Marketing Communications	
A3 Make informed judgements about the role of marketing communications plans and policies within organisations	
A4 Demonstrate a detailed understanding of marketing communications practice and the role of the individual and the organisation in a global, competitive, fast-moving environment	
A5 Understand the importance of current wider issues that impact on the theory and practice of marketing communications	
	Assessment strategies and methods (referring to numbered Intended Learning Outcomes): <ul style="list-style-type: none"> • time-constrained assessments (e.g. exam) (A1– A4); • coursework (A1 – A5); • dissertation (A5).
B: Intellectual skills	The following learning and teaching and assessment strategies and methods

Programme Specification - Section 2

This programme provides opportunities for students to:	enable students to achieve and to demonstrate the programme outcomes:
<p>B1 Develop and apply critical frameworks for the analysis of complex problems and issues in marketing communications</p> <p>B2 Devise methods for the investigation and resolution of academic and professionally oriented research and marketing communications problems</p> <p>B3 Identify and apply appropriate techniques for the comprehensive analysis, evaluation and synthesis of data from a wide variety of research methods</p> <p>B4 Demonstrate the ability to develop new meanings and new critiques of established models and theories in the marketing communications industries</p>	<p>Learning and teaching strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • lectures (B1 - B4); • seminars (B1 – B4); • directed reading (B1 – B4); • use of the VLE (B1 – B4); • independent research (for dissertation and coursework) (B1 – B4). <p>Assessment strategies and methods (referring to numbered Intended Learning Outcomes):</p> <ul style="list-style-type: none"> • Time-constrained assessments (e.g. exam) (B1- B4); • Coursework (B1 – B4); • dissertation (B1 – B4).

ADMISSION REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Admission Regulations with the following exceptions: Applicants whose first language is not English must offer evidence of qualifications in written and spoken English. Acceptable qualifications are: IELTS (academic) 6.5 (with a minimum of 6.0 in each of four categories) or direct equivalent.

PROGRESSION ROUTES

Students who successfully complete the Foundation programme for Media and Communication at Bournemouth University International College with an average of 50% overall and an English exit average of 65% (with a minimum of 60% in each English component) will be accepted on the BA (Hons) Marketing Communications programmes.

Recognition arrangements provide formally approved entry or progression routes through which students are eligible to apply for a place on a programme leading to a BU award. Recognition does not guarantee entry onto the BU receiving programme only eligibility to apply. In some cases, additional entry criteria such as a Merit classification from the feeder programme may also apply. Please see the Recognition Register (https://intranet.bournemouth.ac.uk/pandptest/7J_Recognition_Register_Public.xlsx) for a full list of approved Recognition arrangements and agreed entry criteria.

Programme Specification - Section 2

In order to take advantage of exciting new approaches to learning and teaching, as well as developments in industry, the current, approved Articulation/Recognition/Progression route(s) for this programme may be subject to change. Where this happens students will be informed and supported by the Faculty as early as possible.

ASSESSMENT REGULATIONS

The regulations for this programme are the University's Standard Undergraduate Assessment Regulations.

WORK BASED LEARNING (WBL) AND PLACEMENT ELEMENTS

Students must complete a sandwich placement of 30 weeks, which takes place between the second and final year of study and must relate to learning on the programme. Relevant placement will be broadly defined to allow work placement in a marketing communications, advertising, public relations, and digital media roles in a range of organisations. This can include work in agencies, in-house communications roles, government, charities, NGOs, etc. Successful completion of the placement will require students to submit all relevant documentation set out in the placement handbook/logbook.
